

Deaer sir/madam: I am outraged that the fcc could even consider destroying the little competition there is left in news sources. we must have more competition,not less.The prospect of media corporations being the sole source of information in any area will prove to be the death knell of real democracy ,the cornerstone of our american freedoms. For the sake of freedom now,and freedom for our children ,keep competation -it has served us well for over two hundred years--social darwimism - allowing the sharks to eat the small fish, has no place in america, let competition ring.(signed) Robert G. Mims
